## Internet-Solutions for Your Business

### Core business

The central competence of *RUSit* is the planning, developing, realization, and maintenance of complete IT solutions for professional presentation, communication and business processing in the WWW. We offer analysis, consulting, project planning and realization as well as after sales support. We guaranteed the use of modern tools and trends to make our products fit current and future needs. We harness the skills of experts and professionals to develop and support the web solutions which will exceed the goals and needs of our customers and other stake holders. A very high price to performance ratio is realized by our customers because our business model utilizes a mixture of offshore development coupled with western management techniques. Our competence and experience in project management guarantees the cost control and in time realization.

### Company philosophy

Our target is to give your company the best web solution in online business.

### Company responsibilities

Utilizing our project management experience and tools we take responsibility for achieving the following milestones needed for a successful creation of web solutions:

- Detailed strength and weaknesses analysis of your current internet presentation
- Consulting on possible modifications, time management, and cost savings options that will drive towards better business results
- Development of a project schedule with detailed information concerning resource and time requirements
- Consulting on hardware planning and needs
- Development of necessary software, application, and date base needs
- Implementation and fine tuning of the agreed to online solution
- After sales support and hosting
